

Formex Applications in Data Centers – Cable Tray Liner

Cable Tray Liner (GK-30)

Cable tray liners block unsightly views of overhead cables. Pre-fabricated cut slots allow for easy Velcro fastening.

Formex Benefits:

- UL 94 V-0 flame retardance
- Dielectric insulation
- Modular design to accommodate 18" or 24" wide trays
- Cost efficiency

Formex Applications in Data Centers – Air Flow Control

Air Baffle (GK-40)

Flexible and scalable raised floor partition system solves dynamic thermal imbalances in data centers by directing or blocking airflow under raised floors.

Formex Benefits:

- UL 94 V-0 flame retardance
- Dielectric insulation
- Modular design for scalable installation
- Cost efficiency

Blanking Panels (GK-40)

Blanking panels enable servers to operate at a cooler temperature by filling unoccupied rack space to control bypass airflow.

Formex Applications in Data Centers – Electrical Insulation

Formex Benefits:

- UL 94 V-0 flame retardance
- Superior dielectric strength
- Score & fold for easy 3D design
- Cost efficiency
